

When user enters the search box a info pop up to highlight the search options.

This should not come up the whole time. Once the user click the drop down is should not be shown again to that user.

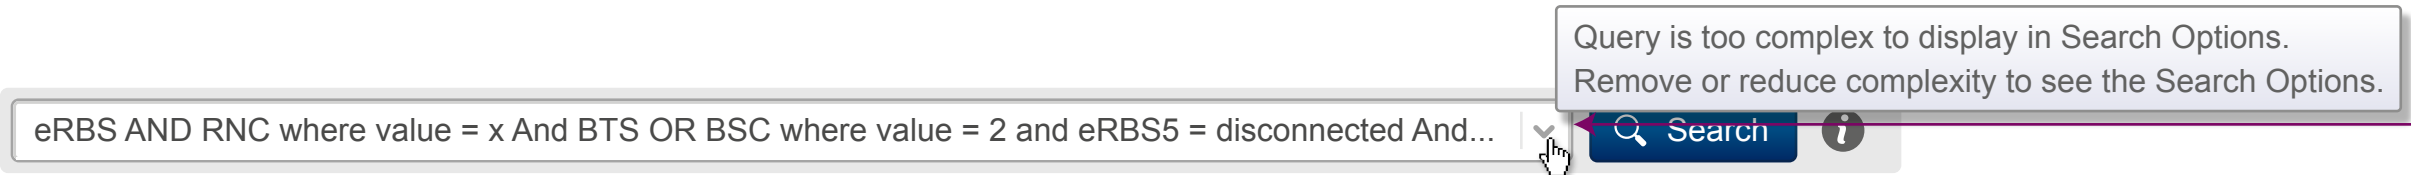

Dropdown to select node type. Model Driven

Field to type Instance

Adding a new row

If search syntax in the field is too complex. i.e. has more than 10 Logical Operators or is Invalid Syntax or is CMEdit syntax then the Search Options is disabled with a tooltip stating why
