Public

On hover of sharing permissions an edit button is available for only private searches. The user cannot change a search from public to private.

On click the arrow a dropdown is provided to click public

Changing Permission

Are you sure you want to change permissions?

You cannot change back from a "Public" to a "Private" permission state.

Don't show this again.

Change Permission

Cancel

Change permission state. Users cannot change from public to a private so a relevant message is shown.

Don't show this again is also needed as this is not a dangerous action.
